

Front Carry for Boba Air

1 Fasten and adjust waist buckle at your back making sure the belt is snug, but not suffocating. Allow the body of the carrier to hang down in front.

2 Bring baby to your chest and separate his or her legs so that they wrap around you and hang over the waist belt.

3 Bring the body of the carrier up over baby's back while securely supporting him or her in your arms.

4 With your right hand supporting baby, place left shoulder strap on your shoulder.

5 Switch supporting hands and bring the right shoulder strap over your shoulder.

6 Bring both hands behind your neck and fasten chest strap. Tighten to secure.

[continued >](#)

Tighten the shoulder straps by pulling down on the adjustment straps if needed, and dive into a day of freedom together.
