

Lucia Style for Boba Carrier

For busy families, there's no reason you should have to take your carrier on and off, on and off, on and off again when you're out and about. The Lucia style is inspired by longtime Boba friend Mama Lucia, and it provides a quick and stylish way to keep your carrier on even when baby's not on board.

1 Carefully remove your child from the carrier. Keep the waist belt fastened and let the carrier hang to your front or back (depending on which style carry you are using).

2 Grab both shoulder straps, bring them behind your back and snap the chest buckles in front of you (if your carrier is hanging from the back) or in back of you (if your carrier is hanging from the front).

3 To loosen or tighten, simply adjust the chest strap as needed.
